

SCHOOL DISTRICT OF BELLEVILLE

2016-17 INITIATIVES

Project Lead the Way

- This year we will expand and launch Project Lead The Way (PLTW) for grades K-12.
- PLTW is a component of STEM (Science, Technology, Engineering and Mathematics).
- PLTW offers an opportunity for students to discover new subject areas, engage with the community, and achieve their career and educational goals.
- As students progress through these courses, they will grow from learning the basics to having the ability to identify a problem and solve it.

One to One Technology

- We are excited to continue and expand our One-to-One (1:1) Technology integration.
- The 1:1 Technology Plan opens doors for students to discover new information, become more engaged as learners in a world-wide community, and achieve success throughout their educational journey.
- The technology break down by grade is as follows: 4K - 1st grade students have access to an iPad or Chromebook, 2nd - 8th grade

Partnerships in Comprehensive Literacy (PCL)

- The School District of Belleville is a certified, regional PCL Center.
- The PCL center works with districts throughout the State of WI to enhance both teachers' and students' educational experiences.
- The PCL model serves school districts by creating a culture that embraces ongoing professional development and collaborative work to engage students in a higher level of learning, resulting in increased student achievement.
