
EXECUTIVE SUMMARY REPORT

Belleville Middle/High School

6/5/2017

What's New?

We are officially underway with today being the start of construction at the Middle/High School! The site was prepped for safety measures as temporary fencing and signs were put up last week. A very busy and exciting summer is ahead of us!

Congratulations to all of the Wildcats who graduated yesterday!

The Past Week

- Job site mobilization
- Installed temporary fencing and signage

Coming Up in the Week Ahead

- Interior demolition
- Building excavation
- Pouring footings and foundation walls

Signage will be placed throughout the site to help direct pedestrian and vehicular traffic.

Material sat staged and ready late Friday afternoon.

A view from Main St (Hwy 69/92) looking back at what will be the new addition.

Did you know? In the coming months, Findorff's virtual construction team will model and our prefabrication team will assemble 2,428 exterior wall panels for a current project. This equates to 60,694 square feet of panels, equivalent to the size of 13 basketball courts! In addition to saving time and budget, the prefabrication process ensures the best quality in a safe controlled environment.
